

Identity, logistics, and visit goals

Decades uses this information to coordinate the diagnostic day across imaging, phlebotomy, and physician consultation.

Form fields

PATIENT ID

PAT-100958

DATE OF BIRTH

22 May 1952

ADDRESS

Frankfurter Allee 77, 10247 Berlin

PHONE

+49 170 3388 2040

EMAIL

robert.becker@example.test

PRIMARY CLINIC

Berlin HQ

PACKAGE

Full Body Diagnostic

PREFERRED REPORT LANGUAGE

English

Logistics

- ☒ I can fast for 10-12 hours before blood draw.
- ☒ I can attend all appointments on the same day.
- ☒ I need a written summary for my GP.
- ☐ I require interpreter support.

Top concerns

Wants a baseline cardiovascular and cancer early-detection review. Father had myocardial infarction at 61. Patient is active but concerned about long-term risk.

Medical and family risk history

Structured history helps the medical team calibrate the physician briefing and choose follow-up priorities.

Form fields

KNOWN DIAGNOSES

Hypertension; borderline LDL elevation

CURRENT MEDICATION

Ramipril 5 mg daily

SMOKING HISTORY

Former smoker, stopped 2009

ALCOHOL

3-4 units per week

EXERCISE

Brisk walking 4x weekly, tennis monthly

PRIOR MAJOR SURGERY

Appendectomy, 1984

FAMILY HISTORY

Father MI at 61; mother colorectal cancer at 74

LAST COLONOSCOPY

2022, no polyps reported

Symptoms requiring physician attention

- ☐ New exertional chest pain
- ☐ Unexplained shortness of breath
- ☐ Unintentional weight loss
- ☐ Change in bowel habit
- ☒ Daytime fatigue
- ☒ No acute symptoms today

Imaging safety screening

These answers are reviewed before MRI and other diagnostic procedures. Decades may request supporting documents.

Form fields

HEIGHT / WEIGHT

178 cm / 84 kg

CLAUSTROPHOBIA

Mild, manageable with coaching

KIDNEY DISEASE

No known kidney disease

CONTRAST REACTION HISTORY

None known

IMPLANTS OR METALWORK

Dental implant, titanium, 2018

PACEMAKER / ICD

No

HEARING AIDS

Yes, removable

MOBILITY LIMITATION

None

Imaging acknowledgements

- ☒ I will remove jewelry, watches, and metal objects.
- ☒ I will bring implant documentation if available.
- ☒ I understand incidental findings may require follow-up.
- ☐ I request sedation for MRI.

Laboratory and data consent

The diagnostic program combines labs, imaging, clinician review, and longitudinal result tracking in the patient portal.

Form fields

CONSENT VERSION

DECADES-FBD-2026-02

LAB PANEL

Comprehensive metabolic, lipid, inflammation, HbA1c

RESULT SHARING

Patient portal and GP letter

RETENTION

Standard medical retention period

DATA EXPORT

Available as PDF and structured JSON

Consent choices

- ☒ I consent to venous blood draw and laboratory analysis.
- ☒ I consent to imaging studies in the selected package.
- ☒ I consent to AI-assisted physician briefing before consultation.
- ☐ I consent to anonymized training or marketing use.

Portal instructions

Patient wants spouse added as emergency contact but not as portal delegate. GP summary should be sent only after final physician sign-off.

Final review and signatures

Final acknowledgements for the full diagnostic day. A clinician will confirm contraindications before any procedure.
